

FEBIADI WISNU AKBAR

Software Engineer & Graphic Designer

Pekalongan, Indonesia

rheatkhs@gmail.com

works.mevia.web.id

linkedin.com/in/fbiakbr • github.com/rheatkhs

Versatile **Software Engineer & Graphic Designer** blending scalable full-stack web engineering, cybersecurity & defensive system hardening, and expressive visual art direction. Proven track record building autonomous multi-agent AI tooling, high-throughput open-source packages, 3D WebGL experiences, and public government platforms. Certified by Google and KOMDIGI in Cybersecurity and Network Administration.

PROFESSIONAL EXPERIENCE

Software Engineer

2024 – 2025

Dinas Komunikasi dan Informatika • Pekalongan, Indonesia

- Architecting, developing, and auditing resilient public digital service web applications with strict security-first engineering practices.
- Engineering robust backend APIs and secure authentication pipelines using PHP (Laravel) and Node.js.
- Performing vulnerability triage, OWASP standard audits, and system reliability enhancements across municipal infrastructure.

Front-End Developer

2022 – 2025

OFFTHEGRID Development Team • Pekalongan, Indonesia

- Spearheaded modern frontend development for interactive digital products and brand showcases.
- Engineered high-performance, accessible client-side architectures utilizing React, Next.js, TypeScript, and modern CSS Grid.
- Integrated complex RESTful and WebSocket feeds with zero layout shifts and optimized Core Web Vitals.

IT Support & Lab Assistant

2020 – 2023

Institut Widya Pratama • Pekalongan, Indonesia

- Maintained campus networking infrastructure, VLAN switching, and lab workstation availability.
- Mentored undergraduate students in programming courses, algorithms, and practical network engineering labs.

FEATURED ENGINEERING PROJECTS

Noir [Open Source](#) [[github.com/rheatkhs/noir](#)] Python • Multi-Agent AI

- Autonomous multi-agent security reconnaissance and penetration testing framework for OpenCode.
- Orchestrates specialized AI agents in ephemeral Docker sandboxes to map attack surfaces and verify CVE regressions safely.

copyright-id [NPM Package](#) [[npm/copyright-id](#)] TypeScript • Open Source

- High-performance, zero-dependency NPM library for Indonesian profanity and evasion detection with smart leetspeak filtering.

Ferrari 296 GT3 3D Configurator [[2960-gt3.vercel.app](#)] Three.js • WebGL • GLSL

- Photorealistic real-time 3D racing showcase with custom shaders, PBR car paint, Draco compression, and 60 FPS mobile performance.

KADIA • AI Legal Drafting Platform Multi-Agent RAG • Laravel

- Municipal legal technology assistant validating official legislation drafts using Multi-Agent AI and Qdrant vector retrieval.
